

Emergency Procedure: Suicide/ Self Harm Reporting

The Governing Board of City Heights Prep Charter School recognizes that suicide is a leading cause of death among youth and that an even greater amount of youth considers (17 percent of high school students) and attempt suicide (over 8 percent of high school students) (Centers for Disease Control and Prevention, 2015).

The possibility of suicide and suicidal ideation requires vigilant attention from our school staff. As a result, we are ethically and legally responsible for providing an appropriate and timely response in preventing suicidal ideation, attempts, and deaths. We also must work to create a safe and nurturing campus that minimizes suicidal ideation in students.

Recognizing that it is the duty of the district and schools to protect the health, safety, and welfare of its students, this policy aims to safeguard students and staff against suicide attempts, deaths and other trauma associated with suicide, including ensuring adequate supports for students, staff, and families affected by suicide attempts and loss. As it is known that the emotional wellness of students greatly impacts school attendance and educational success, this policy shall be paired with other policies that support the emotional and behavioral wellness of students.

This policy is based on research and best practices in suicide prevention, and has been adopted with the understanding that suicide prevention activities decrease suicide risk, increase help-seeking behavior, identify those at risk of suicide, and decrease suicidal behaviors. Empirical evidence refutes a common belief that talking about suicide can increase risk or “place the idea in someone’s mind.”

In an attempt to reduce suicidal behavior and its impact on students and families, the Administration and School Counselor shall develop strategies for suicide prevention, intervention, and postvention, and the identification of the mental health challenges frequently associated with suicidal thinking and behavior. These strategies shall include professional development for all school personnel in all job categories who regularly interact with students or are in a position to recognize the risk factors and warning signs of suicide, including substitute teachers, volunteers, expanded learning staff (afterschool) and other individuals in regular contact with students such as crossing guards, tutors, and coaches.

The Administration and School Counselor shall develop and implement preventive strategies and intervention procedures that include the following:

Overall Strategic Plan for Suicide Prevention

The Administration and School counselor shall involve school-employed mental health professionals (e.g., school counselors, psychologists, social workers, nurses), administrators, other school staff members, parents/guardians/caregivers, students, local health agencies and professionals, law enforcement, and community organizations in planning, implementing, and evaluating the district’s strategies for suicide prevention and intervention. Districts must work in conjunction with local government agencies, community-based organizations, and other community support to identify additional resources.

To ensure the policies regarding suicide prevention are properly adopted, implemented, and updated, the district shall appoint an individual (or team) to serve as the suicide prevention point of contact for the district. In addition, each school shall identify at least one staff member to serve as the liaison to the district’s suicide prevention point of contact, and coordinate and implement suicide prevention activities on their specific

campus. This policy shall be reviewed and revised as indicated, at least annually in conjunction with the previously mentioned community stakeholders.

Prevention

A. Messaging about Suicide Prevention

Messaging about suicide has an effect on suicidal thinking and behaviors. Consequently, Administration and School Counselor along with the school partners has critically reviewed and will continue to review all materials and resources used in awareness efforts to ensure they align with best practices for safe messaging about suicide.

B. Suicide Prevention Training and Education

The Administration and School Counselor along with the school partners has carefully reviewed available staff training to ensure it promotes the mental health model of suicide prevention and does not encourage the use of the stress model to explain suicide.

Training shall be provided for all school staff members and other adults on campus (including substitutes and intermittent staff, volunteers, interns, tutors, coaches, and expanded learning [afterschool] staff) annually.

Training:

- At least annually, all staff shall receive training on the risk factors and warning signs of suicide, suicide prevention, intervention, referral, and postvention.
- All suicide prevention trainings shall be offered under the direction of school-employed mental health professionals (e.g., school counselors, psychologists, or social workers) who have received advanced training specific to suicide and may benefit from collaboration with one or more county and/or community mental health agencies. Staff training can be adjusted year-to-year based on previous professional development activities and emerging best practices.
- All staff shall participate in training on the core components of suicide prevention (identification of suicide risk factors and warning signs, prevention, intervention, referral, and postvention) at the beginning of their employment. Previously employed staff members shall attend a minimum of one-hour general suicide prevention training. Core components of the general suicide prevention training shall include:
 - Suicide risk factors, warning signs, and protective factors;
 - How to talk with a student about thoughts of suicide;
 - How to respond appropriately to the youth who has suicidal thoughts. Such responses shall include constant supervision of any student judged to be at risk for suicide and an immediate referral for a suicide risk assessment;
 - Emphasis on immediately referring (same day) any student who is identified to be at risk of suicide for assessment while staying under constant monitoring by staff member;
 - Emphasis on reducing stigma associated with mental illness and that early prevention and intervention can drastically reduce the risk of suicide;
 - Reviewing the data annually to look for any patterns or trends of the prevalence or occurrence of suicide ideation, attempts, or death. Data from the California School Climate, Health, and Learning Survey (Cal-SCHLS) should also be analyzed to identify school climate deficits and drive program development. See the Cal-SCHLS Web site at <http://cal-schls.wested.org/>

- In addition to initial orientations to the core components of suicide prevention, ongoing annual staff professional development for all staff should include the following components:
 - The impact of traumatic stress on emotional and mental health;
 - Common misconceptions about suicide;
 - School and community suicide prevention resources;
 - Appropriate messaging about suicide (correct terminology, safe messaging guidelines);
 - The factors associated with suicide (risk factors, warning signs, protective factors);
 - How to identify youth who may be at risk of suicide;
 - Appropriate ways to interact with a youth who is demonstrating emotional distress or is suicidal. Specifically, how to talk with a student about their thoughts of suicide and (based on district guidelines) how to respond to such thinking; how to talk with a student about thoughts of suicide and appropriately respond and provide support based on district guidelines;
 - District-approved procedures for responding to suicide risk (including multi-tiered systems of support and referrals). Such procedures should emphasize that the suicidal student should be constantly supervised until a suicide risk assessment is completed;
 - District-approved procedures for responding to the aftermath of suicidal behavior (suicidal behavior postvention);
 - Responding after a suicide occurs (suicide postvention);
 - Resources regarding youth suicide prevention;
 - Emphasis on stigma reduction and the fact that early prevention and intervention can drastically reduce the risk of suicide;
 - Emphasis that any student who is identified to be at risk of suicide is to be immediately referred (same day) for assessment while being constantly monitored by a staff member.
- The professional development also shall include additional information regarding groups of students judged by the school, and available research, to be at elevated risk for suicide. These groups include, but are not limited to, the following:
 - Youth affected by suicide;
 - Youth with a history of suicide ideation or attempts;
 - Youth with disabilities, mental illness, or substance abuse disorders;
 - Lesbian, gay, bisexual, transgender, or questioning youth;
 - Youth experiencing homelessness or in out-of-home settings, such as foster care;
 - Youth who have suffered traumatic experiences;

C. Employee Qualifications and Scope of Services

Employees of City Heights Prep Charter School and their partners must act only within the authorization and scope of their credential or license. While it is expected that school professionals are able to identify suicide risk factors and warning signs, and to prevent the immediate risk of a suicidal behavior, treatment of suicidal ideation is typically beyond the scope of services offered in the school setting. In addition, treatment of the mental health challenges often associated with suicidal thinking typically requires mental health resources beyond what schools are able to provide.

D. Specialized Staff Training (Assessment)

Additional professional development in suicide risk assessment and crisis intervention shall be provided to mental health professionals (school counselors, psychologists, social workers, and nurses) employed by City Heights Prep Charter School.

E. Parents, Guardians, and Caregivers Participation and Education

- To the extent possible, parents/guardians/caregivers should be included in all suicide prevention efforts. At a minimum, schools shall share with parents/guardians/caregivers the Administration and School Counselor, suicide prevention policy and procedures.
- This suicide prevention policy shall be prominently displayed on the City Heights Prep Charter School Web page and included in the parent handbook.
- Parents/guardians/caregivers should be invited to provide input on the development and implementation of this policy.
- All parents/guardians/caregivers should have access to suicide prevention training that addresses the following:
 - Suicide risk factors, warning signs, and protective factors;
 - How to talk with a student about thoughts of suicide;
 - How to respond appropriately to the student who has suicidal thoughts. Such responses shall include constant supervision of any student judged to be at risk for suicide and referral for an immediate suicide risk assessment.

F. Student Participation and Education

The Administration and School Counselor along with its partners has carefully reviewed available student curricula to ensure it promotes the mental health model of suicide prevention and does not encourage the use of the stress model to explain suicide.

Under the supervision of school-employed mental health professionals, and following consultation with county and community mental health agencies, students shall:

- Receive developmentally appropriate, student-centered education about the warning signs of mental health challenges and emotional distress;
- Receive developmentally appropriate guidance regarding the district’s suicide prevention, intervention, and referral procedures.
- The content of the education shall include:
 - Coping strategies for dealing with stress and trauma;
 - How to recognize behaviors (warning signs) and life issues (risk factors) associated with suicide and mental health issues in oneself and others;
 - Help-seeking strategies for oneself and others, including how to engage school-based and community resources and refer peers for help;
 - Emphasis on reducing the stigma associated with mental illness and the fact that early prevention and intervention can drastically reduce the risk of suicide.

Student-focused suicide prevention education can be incorporated into classroom curricula (e.g., health classes, freshman orientation classes, science, and physical education).

The school will support the creation and implementation of programs and/or activities on campus that raise awareness about mental wellness and suicide prevention (e.g., Mental Health Awareness Weeks, Peer Counseling Programs, Freshman Success Programs, and National Alliance on Mental Illness on Campus High School Clubs)

Procedures:

I. Counselor/Admin responsibility for students who threaten of suicide or self-harm while on campus.

- When talking to a student who may be experiencing suicidal/ self-harm ideations, use risk assessment as a guide to determine whether outside services are required (see attachment).
- Never leave the student alone, an adult must have eyes on students at all times once student exhibits high threat behaviors or actions.
- Keep student away from any dangerous materials.
- Do not try to move student off campus.
- If the student is showing immediate signs of danger or is harming themselves, immediately call "911"
- If the student needs immediate referral, staff must call parents of students, and cannot leave until picked up by an adult.
- The parent/ guardian must sign notification release form before leaving campus, which means that it is strongly suggested by the school to get psychological assistance for the student before returning back to school (see attachment).
- If the student is unable to be picked up by a parent/ guardian, staff must call SD PERT team to come pick up the child and take them to a mental health facility. Call San Diego Police Department and request PERT team (858)565-5200.
- School site must keep copies of risk assessment, and parental notification of release in students confidential file.
- Staff will require the parent/guardian to seek appropriate professional help (physician, mental health, professional, or psychologist) before returning to campus.
- If parent/guardian refuses treatment for student, the Administration/School counselor will meet with parent/guardian to discuss barriers to treatment (e.g., cultural stigma, financial issues) and work to rectify the situation and build understanding of the importance of care. If follow-up care for the student is still not provided, school staff should consider contacting Child Protective Services (CPS) to report neglect of the youth.
- A parent/guardian conference is required with school counselor/admin before returning to school. Results of conference and next steps will be shared with teachers and any staff who has contact with the student during the school day.
- Upon return to school, the student will be assigned an adult to monitor follow-up services.

II. Staff Action Plan for Out-of-School Suicide Attempts

- Contact the parents/guardians/caregivers and offer support to the family;
- Discuss with the family how they would like the school to respond to the attempt while minimizing widespread rumors among teachers, staff, and students;
- Obtain permission from the parents/guardians/caregivers to share information to ensure the facts regarding the crisis is correct;
- Designate a staff member to handle media requests;
- Provide care and determine appropriate support to affected students;
- Offer to the student and parents/guardians/caregivers steps for re-integration to school.

A. Responding After a Suicide Death (Postvention)

A death by suicide in the school community (whether by a student or staff member) can have devastating consequences on students and staff. Therefore, it is vital that we are prepared ahead of time in the event of such a tragedy. Administration/School Counselor for City Heights Prep Charter School shall ensure that each school site adopts an action plan for responding to a suicide death as part of the general Crisis Response

CITY HEIGHTS PREP

CHARTER SCHOOL

Plan. The Suicide Death Response Action Plan (Suicide Postvention Response Plan) needs to incorporate both immediate and long-term steps and objectives.

- Administration will confirm death and cause by contacted family within 24 hours.
- Suicide Postvention Plan will hold meeting with school board.
- Notify all staff members in-person or via phone.
- Meeting for staff to include:
 - Notification, emotional support and resources available to staff
 - Notification to students about suicide death and the availability of support services (if this is the protocol that is decided by administration);
 - Share information that is relevant and that which you have permission to disclose.
- Prepare staff to respond to needs of students regarding the following:
 - Review of protocols for referring students for support/assessment;
 - Talking points for staff to notify students;
 - Resources available to students (on and off campus).
- Identify students significantly affected by suicide death and other students at risk of imitative behavior;
- Identify students affected by suicide death but not at risk of imitative behavior;
- Communicate with the larger school community about the suicide death;
- Consider funeral arrangements for family and school community;
- Respond to memorial requests in respectful and non-harmful manner; responses should be handed in a thoughtful way and their impact on other students should be considered;
- Identify media spokesperson skilled to cover story without the use of explicit, graphic, or dramatic content.
 - Utilize and respond to social media outlets:
 - Identify what platforms students are using to respond to suicide death
 - Identify/train staff and students to monitor social media outlets
- Long-term suicide postvention responses:
 - Creating memorials for important dates from events (i.e., anniversary of death, deceased birthday, graduation, or other significant event)
 - Supporting siblings, close friends, teachers, and/or students of deceased

Policy adopted from AB 2246 Pupil Suicide Prevention Policies guidelines and CDE's Model Youth Suicide Prevention Policy.

Student Risk Assessment

- _____ Motivation
- _____ Verbal warnings – overly stated or indirectly shown
- _____ History of previous attempts
- _____ Level of hostility, hopelessness, helplessness
- _____ Level of awareness of alternatives and of consequences of act of suicide
- _____ Assessment of effect – how characterized? Flat, labile?
- _____ Relationship – family; friends; quality
- _____ Capacity for reality testing
- _____ Judgment – enact or absent
- _____ Plan – method, how available are tools
- _____ Level of distress, agitation
- _____ Pessimism
- _____ Situation – what are elements of person's situation at the time of risk
- _____ Self-image
- _____ Stress level – available or not, what kinds – for protection and concern
- _____ Support – available or not, what kinds – for protection and concern
- _____ Impulsivity
- _____ Lethality – a suicidal gesture or successful completion likely?

Risk Assessment Questions

1. Has the person recently withdrawn from therapeutic help?
2. Has the person been abusing alcohol or other drugs recently?
3. Is there a history of suicide in the person's family?
4. Is the person exhibiting marked hostility to those around him or her?
5. Has the person's life become disorganized recently?
6. Does the person drop in and out of school?
7. Has the person become unusually depressed or anxious recently?
8. Has a friend committed suicide recently?
9. Has a relative committed suicide recently?
10. Has the person threatened suicide or spoken about it with friends or teachers?
11. Is the person preoccupied with themes of death or dying?
12. Has the person made previous suicide attempts?
13. Does the person have trouble holding onto friends?
14. Does the person have a "plan" for suicide, and has the person made preliminary arrangements?
15. Has the person made "final arrangements" (given away possessions, said good-bye)?
